SUMMARY

Full-Stack Developer with hands-on experience digitizing manual business workflows into web-based systems. Proficient in Next.js, NestJS, PostgreSQL, and Prisma ORM, with experience deploying applications on self-hosted servers and Google Cloud Platform.

EXPERIENCE

CV. Dwi Persada Makmur - Mataram

Full-Stack Developer (Freelance) | July 2026 - Present

- Developed an internal operations system using Next.js, NestJS, and PostgreSQL (Prisma ORM) to manage the company's end-to-end workflow in the FTTH industry.
- Built modules for material requests, delivery and lending, returns, invoicing with automated tax calculation, and document management.
- Set up CI/CD with GitHub Actions and a self-hosted runner, and deployed the application using PM2, Nginx, and Cloudflare Tunnel.
- Digitized the company's manual end-to-end workflow, covering planning, warehouse, finance, and documentation, into a single integrated web platform.

PT. Petrolab Services - East Jakarta

IT Programmer (Internship) | January - April 2026

- Developed a **Consumable Request Monitoring System** using Next.js and NestJS to replace manual Google Forms and email-based workflows, improving request visibility and reducing missed communications.
- Built end-to-end request management with approval flows, real-time quota monitoring, and automated data recording, backed by PostgreSQL and Prisma ORM.
- Defined API contracts using OpenAPI Specification to ensure clear integration between frontend and backend systems.
- Built a **Vehicle Lending System** mobile application prototype using Flutter to support vehicle booking workflows.

PROJECTS

SIM Qur'an - Full-Stack Developer (**Undergraduate Thesis, 2025)**

- Developed a web-based system for SDIT Ulul Albab Mataram to digitize Quran memorization (tahfidz) and recitation (tahsin) monitoring, replacing a manual process across admins, coordinators, teachers, and parents.
- Built role-based features including student and class management, daily memorization logs, weekly targets, tashih and munaqasyah assessments, and report generation.
- Implemented using Next.js (App Router), Server Actions, Prisma ORM, and PostgreSQL, following Personal Extreme Programming (PXP) across three iterations, and deployed on Vercel.
- Validated through Black Box Testing with all functions passing, and achieved a SUS score of 73.08 (Grade B-, Acceptable) from 30 respondents.

Florify - Backend & Cloud Developer (**Bangkit Academy Capstone Project, 2024)**

- Built the backend architecture for an AI-powered mobile application that provides personalized plant care advice, using Express.js to serve RESTful APIs for mobile features.
- Developed a Flask API to integrate machine learning models, connecting the backend, mobile, and ML components in collaboration with cross-disciplinary teams.
- Deployed services on Google Cloud Platform using App Engine and Cloud Run, and managed data and file storage with Firestore and Cloud Storage.

EDUCATION

Universitas Mataram (2021 - 2025)
Informatics Engineering - GPA 3.78/4.00

TRAINING

Bangkit Academy led by Google, GoTo, and Traveloka
Cloud Computing Cohort | February - June 2024

SKILLS

Programming Languages: JavaScript, TypeScript, Dart
Frontend: Next.js, Shadcn UI
Backend: Express.js, Next.js, NestJS, RESTful API, OpenAPI Specification
Database & ORM: Firestore (NoSQL), MySQL, PostgreSQL, Supabase, Neon, Prisma ORM
Mobile: Flutter
Cloud & DevOps: Google Cloud Platform (Cloud Run, App Engine, Cloud Storage), Vercel, GitHub Actions
Tools: Git, GitHub, Postman
Languages: Indonesian (Native), English (Intermediate)
