SUMMARY

Full-Stack Developer with practical experience building scalable web applications using Next.js and NestJS. Strong focus on backend engineering, including RESTful API design and database architecture with PostgreSQL and Prisma ORM. Experienced in delivering end-to-end solutions through internship, freelance, and academic projects, with additional exposure to cloud deployment on Google Cloud Platform and Vercel.

EXPERIENCE

PT. Petrolab Services - East Jakarta

IT Programmer Intern (January - April 2026)

- Developed a **Consumable Request Monitoring System** using Next.js and NestJS to replace manual google form and email-based workflows, improving request visibility and reducing missed communications.
- Designed a centralized system for end-to-end request management, including approval flows.
- Implemented real-time consumable quota monitoring and automated data recording to improve operational efficiency.
- Designed and implemented a PostgreSQL database using Prisma ORM for efficient and scalable data management.
- Built a **Vehicle Lending System** mobile application prototype using Flutter to support vehicle booking workflows.
- Defined API contracts using OpenAPI Specification to ensure clear integration between frontend and backend systems.

FREELANCE EXPERIENCE

Warehouse Management System - Freelance Full-Stack Developer (July – September 2026)

Client: FTTH Industry Company

- Developed a Warehouse Management System using Next.js and NestJS to streamline inventory tracking and warehouse operations for an FTTH industry client.
- Designed and managed a PostgreSQL database using Prisma ORM to support inbound/outbound stock management.
- Set up a CI/CD pipeline with GitHub Actions and a self-hosted runner to automate build and deployment on a local server.
- Deployed and maintained the application using PM2, Nginx, and Cloudflare Tunnel for reliable production access from a self-hosted environment.
- Collaborated with a fellow developer on both frontend and backend development, ensuring consistent code quality and smooth integration across the stack.

PROJECTS

SIM Quran - Full-Stack (Final Assignment for Undergraduate Degree, 2025)

- Developed a Full-Stack web application using Next.js, integrating both frontend and backend functionalities.
- Designed and managed a PostgreSQL database using Neon and Prisma ORM.
- Deployed the application on Vercel for reliable cloud hosting and accessibility.

Florify - Backend (Bangkit Academy Capstone Project, 2024)

- Developed RESTful APIs using Express.js to support mobile application features.
- Integrated machine learning services via Flask-based APIs.
- Utilized Google Cloud Platform services, including Cloud Run, Cloud Storage, and Firestore, to support scalable backend services and data storage.

EDUCATION

MATARAM UNIVERSITY (2021 - 2025)

Informatics Engineering - GPA 3.78

CERTIFICATION

- Certificate of Completion - Bangkit Academy 2024 Batch 1, Cloud Computing

SKILLS

Frontend Development

- Next.js, Shadcn UI

Backend Development

- Express.js, Next.js, NestJS

Database & ORM

- MySQL, PostgreSQL, Prisma ORM, Prisma Postgres, Supabase, Neon

Mobile Development

- Flutter

Cloud & DevOps

- Google Cloud Platform (Cloud Run, App Engine, Cloud Storage, Firestore), Vercel

Tools

- Git, GitHub, Postman
